

Test Cases for Coffee Machine	
The following outlines some possible test cases for a coffee machine used in cafes from a purely hypothetical perspective.	
Test Case ID	Test Scenarios
TC-01	Verify power on/off functionality
TC-02	Verify water tank functionality
TC-03	Verify coffee bean crushing functionality
TC-04	Verify brewing process
TC-05	Verify grinding process
TC-06	Verify noise level during operation
TC-07	Verify energy consumption during operation
TC-08	Verify brewed coffee temperature
TC-09	Verify user interface clarity and usability
TC-10	Verify overheating protection
TC-11	Verify water leakage
TC-12	Verify cleaning cycle effectiveness
TC-13	Verify descaling cycle effectiveness
TC-14	Verify error handling
TC-15	Verify browser compatibility (if applicable)
